

Written Education Plans

In accordance with Ohio law, all gifted students who are receiving gifted services in Tecumseh Local School District must have a Written Education Plan (WEP) to guide the services. The WEP acts as an individual student planning document and is a communication tool between students, teachers, and parents. It is used to measure the effectiveness of provided gifted services.

Individual Written Education Plans are written annually by gifted specialists in collaboration with classroom teachers for each student receiving gifted educational services. A WEP conference may be scheduled for parents to review and sign off on the plan. All parents as well as staff members responsible for providing services listed will receive copies of the WEP.

Components of the WEP

A Written Education Plan is developed for every student who is receiving gifted educational services in their identification area(s). The WEP includes the following components:

- a description of all gifted services in which the student participates;
- goals for students for each service provided;
- the staff person responsible for ensuring the delivery of services;
- the method to be used to evaluate progress toward each specified goal;
- the process and schedule for reporting progress to parents;
- the deadline for the next review of the WEP.
