

Math Vocabulary – Semester 1

Week 1: equation, product, simplify, evaluate, quotient

Week 2: multiple, percent, ratio, equivalent, algebraic expression

Week 3: rational number, irrational number, variable, prime number, composite number

Week 4: origin, inverse operation, absolute value, function, quadrant

Week 5: prime factorization, estimate, median, range, equivalent fractions

Week 6: mixed number, improper fraction, reciprocal, least common denominator, greatest common factor

Week 7: multiplicative inverse, circumference, radius, probability, rate

Week 8: diameter, pi, proportion, perimeter, area

Week 9: part, scale, rate, base, scale factor

Week 10: survey, sales tax, discount, theoretical probability, experimental probability

Week 11: angle, degrees, scalene triangle, isosceles triangle, equilateral triangle

Week 12: quadrilateral, parallelogram, trapezoid, rhombus, similar figures

Week 13: review
