### 5330 - USE OF MEDICATIONS

The Board of Education shall not be responsible for the diagnosis and treatment of student illness. With the exception of diabetes care covered under Policy 5336, the administration of prescribed medication and/or medically-prescribed treatments to a student during school hours will be permitted only when failure to do so would jeopardize the health of the student, the student would not be able to attend school if the medication or treatment were not made available during school hours, or if the child is disabled and requires medication to benefit from the educational program.

For purposes of this policy, "medication" shall include all medicines including those prescribed by a licensed health professional authorized to prescribe drugs and any nonprescribed (over-the-counter) drugs, preparations, and/or remedies. "Over-the-counter drug" means a drug, as defined in section 4729.01 of the Revised Code, that may be legally sold without a prescription and that is administered without the instruction of a prescriber. "Prescription drug" means a drug, as defined in section 4729.01 of the Revised Code, that is to be administered pursuant to the instructions of the prescriber, whether or not required by law to be sold only upon a prescription. "Treatment" refers both to the manner in which a medication is administered and to health-care procedures which require special training, such as catheterization.

Before any prescription medication (i.e., a drug) or treatment may be administered to any student during school hours, the Board shall require a written statement from a licensed health professional authorized to prescribe drugs ("prescriber") accompanied by the written authorization of the parent (see Form 5330 F1, Form 5330 F1a, and Form 5330 F1b). These documents shall be kept on file in the office of the nurse, and made available to the persons designated by this policy as authorized to administer medication or treatment. A copy of the parent's written request and authorization and the prescriber's written statement must be given, by the next school day following the District's receipt of the documents, to the person authorized to administer drugs to the student for whom the authorization and statement have been received. No student is allowed to provide or sell any type of over-the-counter medication to another student. Violations of this rule will be considered violations of Policy 5330 - Drug Prevention and Policy 5500 - Student Code of Conduct.

For prescription drugs, only medication in its original container; labeled with the date, if a prescription; the student's name; and exact dosage will be administered. Over-the-counter drugs must be provided and maintained in the original manufacturer's packaging. The Superintendent shall determine a location in each building where the medications to be administered under this policy shall be stored, which shall be a locked storage place, unless the medications require refrigeration in which case they shall be stored in a refrigerator in a place not commonly used by students, and unless the medication to be administered is seizure or diabetes medication, which may be kept in an easily accessible location as determined by the Principal pursuant to this Policy and/or Policy 5336. ~~diabetes medication, which must be kept in an easily accessible location pursuant to Policy 5336~~

Parents may administer medication or treatment, with the exception of diabetes care covered under Policy 5336 but only in the presence of a designated school employee.

However, students shall be permitted to carry and use, as necessary, an asthma inhaler, provided the student has prior written permission from the student's parent and physician and has submitted Form 5330 F3, Authorization for the Possession and Use of Asthma Inhalers/Other Emergency Medication(s), to the principal and any school nurse assigned to the building.

Additionally, students shall be permitted to carry and use, as necessary, an epinephrine autoinjector to treat anaphylaxis, provided the student has prior written approval from the prescriber of the medication and the student's parent/guardian, if the student is a minor, and has submitted written approval (Form 5330 F4, Authorization for the Possession and Use of

Epinephrine Autoinjector (epi-pen)) to the principal and any school nurse assigned to the building. The parent/guardian or the student shall provide a back-up dose of the medication to the principal or school nurse. This permission shall extend to any activity, event, or program sponsored by the school or in which the school participates. In the event epinephrine is administered by the student or a school employee at school or at any of the covered events, a school employee shall immediately request assistance from an emergency medical service provider (911).

Students may possess a drug prescribed to the student to prevent the onset of a seizure or to alleviate the symptoms of a seizure, provided that the student has prior written approval from the student's physician, and if the student is a minor, the written approval of the student's parent or guardian (Form 5330 F5 - Authorization for the Possession and Use of Seizure Medications). Copies of the written approvals must be provided to the Principal and any school nurse assigned to the building. This permission shall extend to any activity, event, or program sponsored by the school or in which the school participates.

Students with diabetes authorized to attend to their diabetes care and management may do so in accordance with Policy 5336.

Students shall be permitted to possess and self-administer over-the-counter topical sunscreen products while on school property or at a school-sponsored event.

With the exception of diabetes care covered under Policy 5336, only employees of the Board who are licensed health professionals or who have completed a drug administration training program conducted by a licensed health professional and are designated by the Board may administer prescription and over-the-counter drugs to students in school.

With the exception of diabetes care covered under Policy 5336, provided they have completed the requisite training, the following staff are authorized to administer medication and treatment to students:

- A. principal
- B. teacher
- C. school nurse
- D. building secretary
- E. aide
- F. others as designated by student's IEP and/or 504 plan

Individuals who administer medications designed to prevent the onset of seizures or alleviate the symptoms of a seizure will receive training regarding the circumstances under which the drug is to be administered to the student and how it should be administered. They will also receive a copy of the written approval issued by the student's physician.

No employee will be required to administer a drug to a student if the employee objects, on the basis of religious convictions, to administering the drug.

With the exception of diabetes care covered under Policy 5336, the Board shall permit the administration by a licensed nurse or other authorized staff member of any medication requiring intravenous or intramuscular injection or the insertion of a device into the body when both the medication and the procedure are prescribed by a licensed health professional authorized to prescribe drugs and the nurse/staff member has completed any and all necessary training.

Students who may require administration of an emergency medication may have such medication in their possession upon written authorization of their parent(s) or, such medication, upon being identified as aforementioned, may be stored in the clinic office and administered in accord with this policy and Policy 5336.

Students who are experiencing an apparent opioid-related drug overdose may be administered Naloxone (Narcan) by the school nurse, or a trained school employee, to a student or other individual on school grounds in accordance with Board policy and AG 5330.05. Emergency services will be contacted as soon as is practicable. A designated staff member will also promptly notify the student's parent/guardian.

All dental disease prevention programs, sponsored by the Ohio Department of Health and administered by school employees, parents, volunteers, employees of local health districts, or employees of the Ohio Department of Health, which utilize prescription drugs for the prevention of dental disease and which are conducted in accordance with the rules and regulations of the Ohio Department of Health are exempt from all requirements of this policy.

The Superintendent shall prepare administrative guidelines, as needed, to address the proper implementation of this policy.
